

**1. All of the following are some practical steps for getting rid of most sleep problems EXCEPT:**

- Don't change your sleep time
- Avoid caffeine
- **Taking sleeping pills**
- Learn some relaxation exercise

**2. Which of the following gland is located in the neck?**

- Pineal gland
- **Thyroid gland**
- Pituitary gland
- Pancreas

**3. Railroad tracks, highway tracks appear to be converging at some distance. This is an example of which of the following monocular cue?**

- **Linear perspective**
- Texture gradient
- Motion parallax
- Interposition

**4. Which of the following part of brain is involved in the process of learning and memory?**

- Pons
- **Hippocampus**

- Hypothalamus
- Amygdale

5. Which of the following phenomena is of particular importance for the people who have to constantly monitor e.g. pilots, traffic controllers, rescue workers and fireman?

➤ **Selective attention**

- Convergence
- Accommodation
- Occlusion

6. Which of the following is a scan showing biochemical activity within the brain at any given moment?

- MRI
- CAT
- **PET**
- EEG

7. Endocrine glands are----- glands that secrete their hormones directly into blood stream.

- Baseless
- Threadlike
- **Ductless**
- Boneless

**8. Which of the following system controls the voluntary movements all over the body?**

- Central nervous system
- Limbic system
- Substantia nigra
- **Automatic nervous system**

**9. The spinal cord is about 45 cm long in men and -----cm long in women.**

- 41
- 42
- **43**
- 40

**10. Which of the following is a swollen, bulblike structure at one end of the axon?**

- Dendrites
- Soma

➤ **Terminal button**

➤ Axon

**11. Which of the following monocular cue refers that higher objects seem to be more distant?**

➤ Relative size

➤ Relative motion

➤ Interposition

➤ **Relative height**

**12. Which of the following lobes associated with visual processing?**

➤ Temporal lobe

➤ **Occipital lobe**

➤ Frontal lobe

➤ Parietal lobe

**13. The process of simply getting information about sensory stimuli into the body is known as what?**

➤ Olfaction

➤ **Perception**

➤ Sensation

➤ Organization

**14. All of the following are the stimulants EXCEPT:**

- Amphetamines
- Benzedrine
- Cocaine
- **Barbiturates**

**15. Which of the following monocular cue refers that the two parallel lines seem to be converging at some point indicating increasing distance?**

- Motion parallax
- Texture gradient
- Interposition
- **Linear perspective**

**16. In which of the following disease, a person is unable to see specific color?**

- Color Specific
- **Color blindness**
- Rod monochromacy
- Tritanopia

**17. Which of the following is the condition in which personal is in a highly suggestible state?**

- Dream
- Sleep
- Under drug influence
- **Hypnosis**

**18. What do we call male sex hormones?**

- **Androgens**
- Thyroid
- Estrogens
- Progesterone

**19. Visual distance and depth cues that require the use of both eyes are called -----?**

- Diocular cues
- **Monocular cues**
- Binocular cues
- Dichromatic cues

**20. Which of the following stage refers to the transition between wakefulness and sleep?**

- Stage -3 sleep
- Stage-2 sleep
- Stage-4 sleep
- **Stage-1 sleep**

**21. Who among the following proposed the opponent process theory of color vision?**

- **Hering**
- Helmholtz
- Thomas young
- Goethe

**22. Hormones secreted into the bloodstream in excessive amounts during strong emotional states such as.**

**23. Which among the following gave the cognitive Appraisal theory of emotions (Richard Lazarus)**

**24. Amnesia has types (two)**

**25. Modern psychology deals with (Mental process and behavior )**

**26. It is the storehouse for facts and general knowledge about the world (semantic memory)**
