BT101 Final Term Mcqs Ppts # 81------95

- When did the Charles Robert Darwin born & die — 1809–1882
- In which country Charles Robert Darwin born — England
- When did Charles Robert Darwin joined school of medicine — 1825
- When did the Charles Robert Darwin complete his graduation — 1831
- _____nominated Darwin to serve as a naturalist — John Henslow
- Full Form of HMS — Her Majesty's Ship. His or Her Majesty's Ship
- HMS Beagle set sail on December 27_____ — 1831
- Most importantly, Darwin spent 5 weeks on the _____Islands — Galápagos
- Length of volcanic islands _____ km — 900
- When did the book " Origin of Species" publish in — 1859
- There are _____ major evidences Darwin theory — Three
- Who proposed the ideas of geology — Charles Lyell and James Hutton
- Theory of uniformitarianism planted _____ideas in Darwin's mind — two
- The earth could be much older than _____years — 6,000
- Gradual changes over the time with changing environment was foundation of _____ — Theory of natural selection
- Extinct hippopotamus like animal, now called — Toxodon
- Horses had become extinct long ago in _____- — S. America
- Horses were introduced in _____ — 1500
- Where the large tortoises are present — Galápagos Islands
- Tortoises from the drier regions had _____necks — long
- Tortoises from wetter habitats had _____necks — Small
- _____species of finches arose from this ancestral group — 14
- Formation of new forms from an ancestral species, usually in response to the opening of new habitats are called — adaptive radiations
- Darwin proposed his theory of natural selection in form of "Origin of Species" in_____ — 1859
- Theory of natural selection has_____ major postulates — four
- Female sea star releases about _____eggs each season — 1 million
- In sea star _____type of competition — 2 (1. Intraspecific, 2. Inter specific)
- Inherited variations arise by _____ — random mutation
- Variations can be advantageous or _____ — harmful
- In Survival of the Fittest Higher rate of population growth causes _____of resources. — Depletion
- Traits that promote successful reproduction are said to be _____ — adaptive
- When did the Alfred Russel Wallace born & died — (1823- 1913)
- _____was Co-discoverer of theory of natural selection — Alfred Russel Wallace
- Change in gene frequency is called as _____ — genetic drift
- Higher the number of trials, closer to ratio of _____ — 50:50
- Smaller the number, disproportionate ratio like_____ — 70:30
- In small populations, inbreeding is _____ — common
- There are _____ Types of Genetic Drift — 2 (1. Founder Effect, 2. Bottleneck Effect)
- when number of individuals in a population is drastically reduced that is called as _____ — Bottleneck Effect
- There are _____ Conditions of Natural Selection — Three
- Fitness of the green phenotype would be — 1.00
- Fitness of the brown phenotype would be — 0.625
- There are _____ Components of Fitness — 3
- Frequency dependent selection has _____types — 2 (1. Negative, 2. Positive)
