ACC501 FINAL TERM PAPER SHARED BY STUDENT

ON AUGUST 22, 2015 AT 11:10PM

Paper ACC501 (Business finance)
22/8/2015
4.30 pm
MCQS were new not from past papers and subjective were:
• What is the reason for tax payment for the difference of market value and book value?

• Use the given info to compute operating cash flow for a project under consideration where tax rate is (34%)

Sale= 60000
Variable cost= 32000
Fixed cost= 6000
Depreciation= 7000

• What is the main argument of M&M against the traditional approach to capital structure and valuation?

• If a firm has 40% debt and 60% equity in its capital structure, the firm estimated after tax cost of debt is 7% and estimate cost of equity is 12%. Determine the firm's weighted average cost of capital?
• What is return? Describe its components and relation with the risk.

• Calculate (A) operation cash flow, (B) depreciation tax shield (C) operation cash flow if there is no depreciation.

From given data
Sale= 150000
Costs=100000
Tax rate=35%
Depreciation=20000

• What will be the WACC of the firm if
1. If Firm capital structure has 75 % equity, 25 % debt while with cost as 10% and 20% respectively and tax rate is 28 %.
2. If firm capital structure has 25% debt 75 % equity while firm estimated ater tax cost of debt is 7% and cost of equity is 11%.
• An investor places 40% of his funds in security A and balance in security B. the expected return on A and B are 10% and 15% respectively. Calculate the expected return on portfolio.
• MS CO has paid annual dividend as follow

Year: Dividend
1 1.10
2 1.12
3 1.15
4 1.20
5 1.23

Calculate the average growth rate of dividend and value of DI for 6th year.

ACC501 FINAL TERM PAPER SHARED BY STUDENT

ON AUGUST 23, 2015 AT 6:20AM
