CS504 – Software Engineering I

Assignment Title: Use Case Diagram – Online Bake Shop

Student ID: bc…….

Name:QALB-e-MOMIN

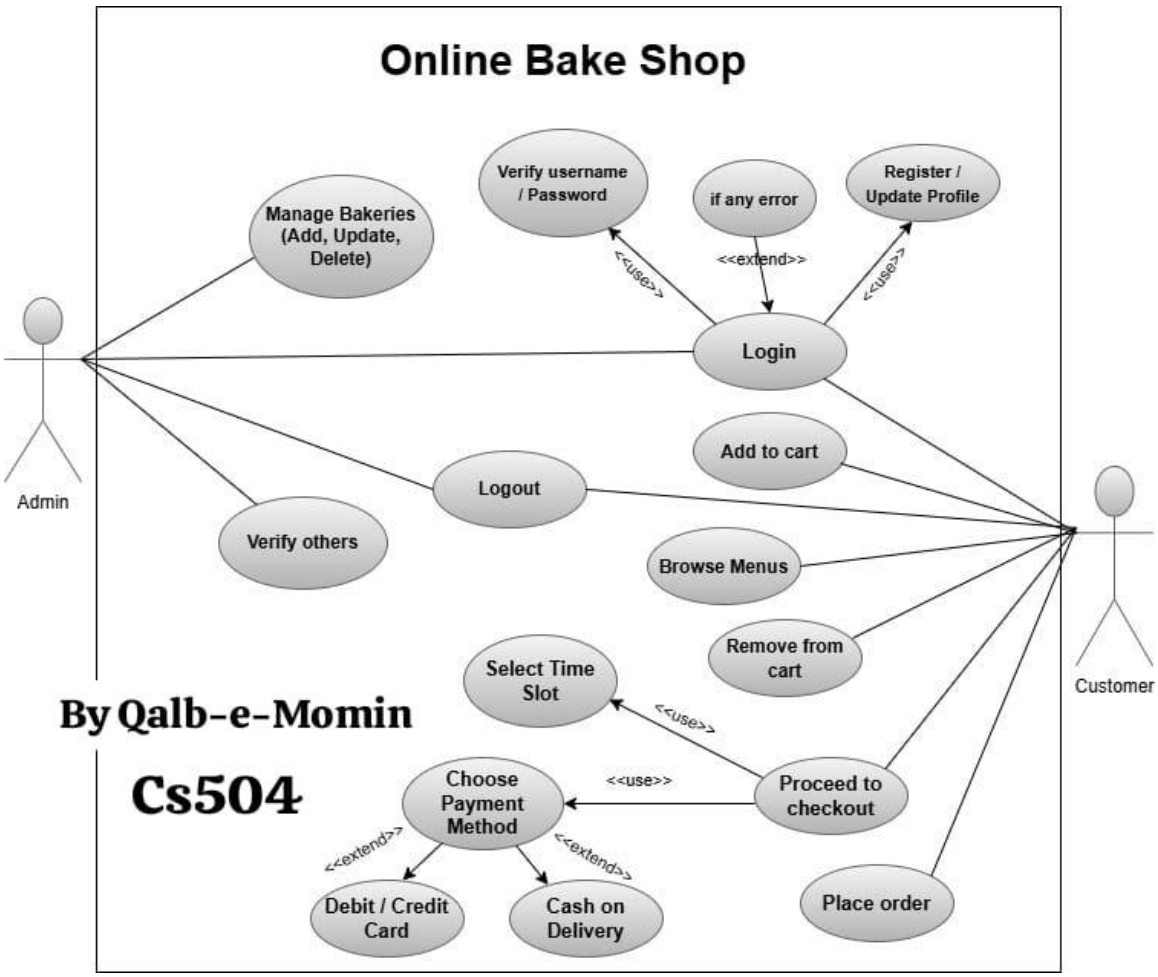

Question No.1

Read the above case study carefully and draw the Use case diagram (with proper format) of the online Bake Shop Website by using Lucid chart, Creately, Visual paradigm online or some other drawing tool (supporting the UML notations) to develop the required diagram.

Solution:

The following Use Case Diagram represents the functional requirements of the Online Bake Shop system. It includes two main actors: **Customer and Admin**.

- **Customer** can register, log in, browse bakery menus, add items to the cart, proceed to checkout, choose a time slot and payment method, place the order, and log out.
- **Admin** can log in/out, and manage bakeries (add, update, delete), and verify customer orders.
